

Projekt w ramach przedmiotu Bazy Danych

Skład zespołu:

Jan Boduch

Mariusz Rogucki

Sebastian Dąbek

AGH

Wykorzystane technologie:

- Docker
- Docker Compose
- MySQL
- PHP7
- Wrapper
- orphans/mysql-wrapper

Uruchomienie programu:

Opcja nr 1:

Uruchomienie za pomocą skryptu „start.sh” (./start.sh, w razie potrzeby chmod + x start.sh)

Opcja nr 2:

Wykonanie poleceń:

```
docker build -t my_php -f website/Dockerfile website
```

```
docker-compose up
```

Opis wykorzystanych technologii:

Docker Compose to narzędzie do uruchamiania wielokontenerowych aplikacji. Kontenery, które zostaną uruchomione są zdefiniowane w pliku docker-compose.yml

Stworzony przez nas plik docker-compose:

```
1  version: '3'
2
3  services:
4
5      db:
6          image: mysql:5.7
7          environment:
8              MYSQL_ROOT_PASSWORD: 123
9              MYSQL_DATABASE: test_db
10             MYSQL_USER: user1
11             MYSQL_PASSWORD: 123
12          volumes:
13              - ./data:/var/lib/mysql
14          ports:
15              - 5001:3306
16          restart: always
17
18      phpmyadmin:
19          depends_on:
20              - db
21          image: phpmyadmin/phpmyadmin
22          restart: always
23          ports:
24              - '5002:80'
25          environment:
26              PMA_HOST: db
27              MYSQL_ROOT_PASSWORD: 123
28
29      website:
30          image: my_php
31          volumes:
32              - ./website:/var/www/html
33          ports:
34              - 5000:80
35          depends_on:
36              - db
```

orphans/mysql-wrapper: „A database wrapper class to help reduce code and support rapid development”

Jak skonfigurować?

1.) Stworzyć plik connect.php

```
<?php

require_once('wrapper/mysql_wrapper.class.php');

$db = new MYSQL_WRAPPER();

$db->connect(array(
    'host' => 'db',
    'port' => '3306',
    'username' => 'user1',
    'password' => '123',
    'database' => 'test_db'
));
```

2.) Wczytać plik connect.php w module, w którym planujemy go użyć

```
include(„connect.php”);
```

3.)Wykonać zapytanie

INSERT

```
$db->insert('users', [
    'name' => 'John Smith',
    'email' => 'john.smith@somedomain.com',
    'last_updated' => 'NOW()',
]);
```

UPDATE

```
$db->update("employees", $_POST, "`EmployeeID`=:employeeID", ['employeeID' => $employeeID]);
```

DELETE

```
$delete = $db->delete("employees", "`EmployeeID`=:employeeID",
[
    'employeeID' => $employeeID
]);
```

SELECT

```
$db->select("SELECT * FROM `orders`");
```

Operacje CRUD są wykonywane na tabelach Employee, Customers, Orders, Products.

Mamy również możliwość skorzystania z modułu Stats.

Moduł Stats:

Jak widać poniżej mamy do wyboru 9 opcji odnośnie statystyk serwisu.

1. Ilość zamówionych produktów przez daną firmę
2. Ilość produktów w konkretnym zamówieniu
3. Ilość zamówień dokonanych przez daną firmę
4. Najczęściej zamawiane produkty
5. Ilość zamówień zrealizowanych przez danego pracownika
6. Ilość zamówień do konkretnych miast
7. Historia zamówień
8. 10 najdroższych zamówień
9. Zamówienia rok do roku

Ad1. W każdym zapytaniu mamy wyświetlany czas w mikrosekundach.

Ilość zamówionych produktów przez daną firmę

Czas wykonywania zapytania = 9.0599060058594 mikrosekund

No	Company Name	TotalQuantity
1	Save-a-lot Markets	4958
2	Ernst Handel	4543
3	QUICK-Stop	3961
4	Hungry Owl All-Night Grocers	1684
5	Frankenversand	1525
6	Rattlesnake Canyon Grocery	1383
7	Folk och f? HB	1234
8	HILARI?N-Abastos	1096
9	Supr?mes d?lices	1079
10	White Clover Markets	1063
11	Queen Cozinha	1031
12	Berglunds snabbk?p	1001
13	Bon app'	980

Zapytanie:

```
SELECT CompanyName, sum(howMany) as TotalQuantity
FROM (SELECT CompanyName, OrderID, sum(Quantity) as howMany FROM `orders`
NATURAL JOIN `customers` NATURAL JOIN `order_details` GROUP BY OrderID
ORDER BY CompanyName, OrderID) AS table1 GROUP BY CompanyName ORDER BY
`TotalQuantity` DESC
```

Ad2.

Ilość produktów w konkretnym zamówieniu

Czas wykonywania zapytania = 0 mikrosekund

No	OrderID	Ilość produktów
1	10895	346
2	11030	330
3	10847	288
4	10515	286
5	10678	280
6	10612	263
7	10990	256
8	10658	255
9	10845	245
10	10324	241
11	10451	238
12	10514	233
13	10595	215
14	10607	213
15	10440	208

Zapytanie:

```
SELECT OrderID, sum(Quantity) FROM `order_details` GROUP BY OrderID ORDER BY  
`sum(Quantity)` DESC
```

Ad3.

Ilość zamówień dokonanych przez daną firmę

Czas wykonywania zapytania = 0 mikrosekund

No	CustomerID	CompanyName	Ilość zamówień
1	RATTC	Rattlesnake Canyon Grocery	25
2	SAVEA	Save-a-lot Markets	6
3	ERNSH	Ernst Handel	6
4	SAVEA	Save-a-lot Markets	6
5	QUEEN	Queen Cozinha	5
6	SUPRD	Supr?mes d?lices	5
7	ERNSH	Ernst Handel	5
8	AROUT	Around the Horn	5
9	FRANK	Frankenversand	5
10	ERNSH	Ernst Handel	5

Projekt na **Bazy Danych** by Jan Boduch, Sebastian Dąbek, Mariusz Rogucki. 2020.

Zapytanie:

```
SELECT CustomerID, CompanyName, count(OrderID) FROM `customers`  
NATURAL JOIN `orders` NATURAL JOIN `order_details` GROUP BY OrderID ORDER BY  
`count(OrderID)` DESC LIMIT 10
```

Ad 4.

Najczęściej zamawiane produkty

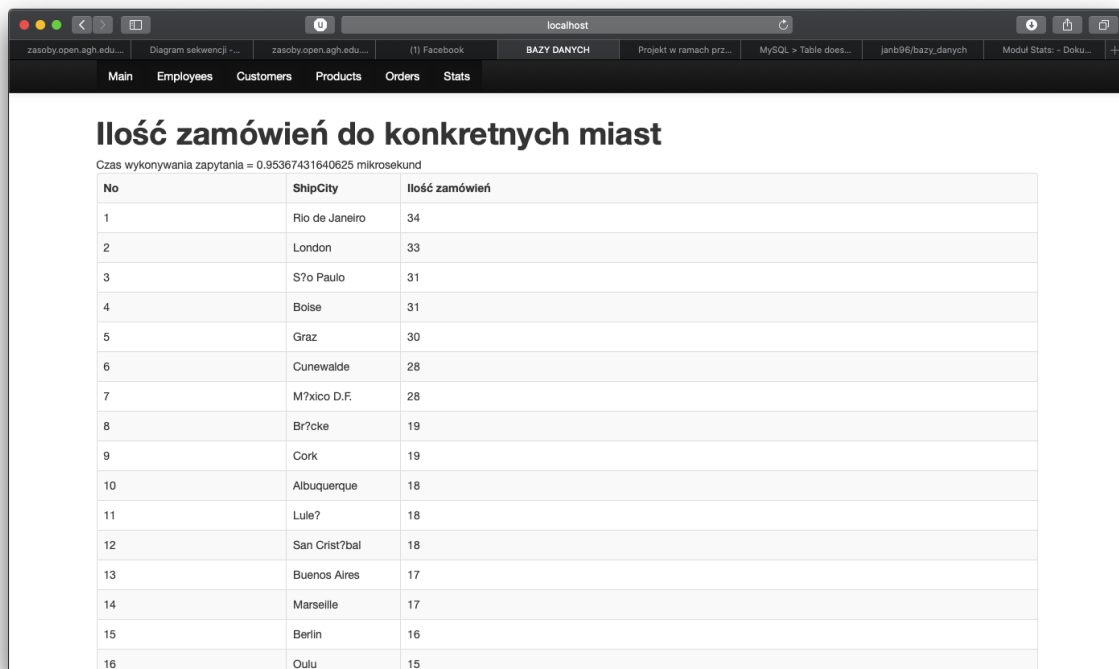

Czas wykonywania zapytania = 0.95367431640625 mikrosekund

No	ProductID	Ilość zamówień)
1	60	1577
2	59	1496
3	31	1397
4	56	1263
5	16	1158
6	75	1155
7	24	1125
8	40	1103
9	62	1083
10	2	1057
11	71	1057
12	21	1016
13	1	985
14	41	981
15	76	981

Zapytanie:

```
SELECT ProductID, sum(Quantity) as howMuch FROM `order_details` GROUP BY  
ProductID ORDER BY `howMuch` DESC
```

Ad5.

The screenshot shows a web browser window with a dark theme. The address bar shows 'localhost'. The browser has several tabs open, including 'zasoby.open.agh.edu...', 'Diagram sekwencji...', 'zasoby.open.agh.edu...', '(1) Facebook', 'BAZY DANYCH', 'Projekt w ramach prz...', 'MySQL > Table does...', 'janb96/bazy_danych', and 'Modul Stats: - Doku...'. The application has a navigation bar with links: 'Main', 'Employees', 'Customers', 'Products', 'Orders', and 'Stats'. The main content area has a title 'Ilość zamówień do konkretnych miast' and a subtitle 'Czas wykonywania zapytania = 0.95367431640625 mikrosekund'. Below this is a table with 3 columns: 'No', 'ShipCity', and 'Ilość zamówień'. The table contains 16 rows of data, sorted by 'Ilość zamówień' in descending order.

No	ShipCity	Ilość zamówień
1	Rio de Janeiro	34
2	London	33
3	S?o Paulo	31
4	Boise	31
5	Graz	30
6	Cunewalde	28
7	M?xico D.F.	28
8	Br?cke	19
9	Cork	19
10	Albuquerque	18
11	Lule?	18
12	San Crist?bal	18
13	Buenos Aires	17
14	Marseille	17
15	Berlin	16
16	Oulu	15

Zapytanie:

```
SELECT EmployeeID, count(OrderID) as howMuch
FROM `order_details` NATURAL JOIN `orders` NATURAL JOIN `employees` GROUP BY
EmployeeID ORDER BY `howMuch` DESC
```

```

## Operacja CRUD na tabeli Employee.

### 1. Dodawanie pracownika.

| Employees                                                                  | Customers                                  | Products | Orders |
|----------------------------------------------------------------------------|--------------------------------------------|----------|--------|
| First Name                                                                 | <input type="text" value="Mariusz"/>       |          |        |
| Last Name                                                                  | <input type="text" value="Rogucki"/>       |          |        |
| Title                                                                      | <input type="text" value="mr"/>            |          |        |
| Title Of Courtesy                                                          | <input type="text" value="MR"/>            |          |        |
| Home Phone                                                                 | <input type="text" value="509866455"/>     |          |        |
| Address                                                                    | <input type="text" value="Parkowa"/>       |          |        |
| City                                                                       | <input type="text" value="Bialystok"/>     |          |        |
| Country                                                                    | <input type="text" value="Polska"/>        |          |        |
| Notes                                                                      | <input type="text" value="pracownik"/>     |          |        |
| BirthDate                                                                  | <input type="text" value="1988-09-06"/>    |          |        |
| HireDate                                                                   | <input type="text" value="2019-01-01"/>    |          |        |
| ReportsTo                                                                  | <input type="text" value="Nancy Davolio"/> |          |        |
| <input type="button" value="INSERT"/> <input type="button" value="RESET"/> |                                            |          |        |

i po kliknięciu "INSERT" otrzymujemy taki wynik:

|                      |                                                                            |
|----------------------|----------------------------------------------------------------------------|
| <input type="text"/> | <input type="button" value="INSERT"/> <input type="button" value="RESET"/> |
|----------------------|----------------------------------------------------------------------------|

Dodano pracownika

Projekt na **Bazy Danych** by Jan Boduch, Sebastian Dąbek, Mariusz Rogucki. 2019.

Następnie na liście wszystkich pracowników widzimy nowo dodanego pracownika:

|    |         |           |                      |     |               |                   |           |                |                                                                              |
|----|---------|-----------|----------------------|-----|---------------|-------------------|-----------|----------------|------------------------------------------------------------------------------|
| 9  | Anne    | Dodsworth | Sales Representative | Ms. | (71) 555-4444 | 7 Houndstooth Rd. | London    | United Kingdom | <input type="button" value="Edit"/><br><input type="button" value="Delete"/> |
| 10 | Mariusz | Rogucki   | mr                   | MR  | 509866455     | Parkowa           | Bialystok | Polska         | <input type="button" value="Edit"/><br><input type="button" value="Delete"/> |

Możemy również edytować pracownika. Po kliknięciu "Edit" otrzymujemy taki wynik:

|                                       |                                                   |          |        |
|---------------------------------------|---------------------------------------------------|----------|--------|
| Employees                             | Customers                                         | Products | Orders |
| First Name                            | <input type="text" value="Maria"/>                |          |        |
| Last Name                             | <input type="text" value="Dodsworth"/>            |          |        |
| Title                                 | <input type="text" value="Sales Representative"/> |          |        |
| Title Of Courtesy                     | <input type="text" value="Ms."/>                  |          |        |
| Home Phone                            | <input type="text" value="(71) 555-4444"/>        |          |        |
| Address                               | <input type="text" value="7 Houndstooth Rd."/>    |          |        |
| City                                  | <input type="text" value="London"/>               |          |        |
| Country                               | <input type="text" value="United Kingdom"/>       |          |        |
| <input type="button" value="UPDATE"/> |                                                   |          |        |

Projekt na **Bazy Danych** by Jan Boduch, Sebastian Dąbek, Mariusz Rogucki. 2019.

Po zmianie danych (w tym przypadku imienia) i kliknięciu “UPDATE” widzimy na liście pracowników dokonane zmiany (zmiana w pozycji 9. imienia Anne na Maria):

|   | Employees | Customers | Products                 | Orders |                |                               |          |                |                                   |  |
|---|-----------|-----------|--------------------------|--------|----------------|-------------------------------|----------|----------------|-----------------------------------|--|
| 1 | Nancy     | Davolio   | Sales Representative     | Ms.    | (206) 555-9857 | 507 - 20th Ave. E.Apt. 2A     | Seattle  | United States  | <div>Edit</div> <div>Delete</div> |  |
| 2 | Andrew    | Fuller    | Vice President, Sales    | Dr.    | (206) 555-9482 | 908 W. Capital Way            | Tacoma   | United States  | <div>Edit</div> <div>Delete</div> |  |
| 3 | Janet     | Leverling | Sales Representative     | Ms.    | (206) 555-3412 | 722 Moss Bay Blvd.            | Kirkland | United States  | <div>Edit</div> <div>Delete</div> |  |
| 4 | Margaret  | Peacock   | Sales Representative     | Mrs.   | (206) 555-8122 | 4110 Old Redmond Rd.          | Redmond  | United States  | <div>Edit</div> <div>Delete</div> |  |
